DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 13-20, drawn to a method for producing a colored sand composition.

Group II, claim(s) 21-28, drawn to a composition comprising colored silica grains.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The special technical feature of a composition of colored silica grains wherein the silica grains are coated with a pigment and at least one other component such as binder or water is disclosed in U.S. Patent Application Publication No. 2003/0101644 to Hamilton, JR. (Abstract) where said reference discloses sand colored with a colorant wherein the colorant can be prepared by mixing a latex paint, and Yun et al. (U.S. Patent No. 4,226,754) makes it clear that latex paint compositions typically comprise binder and a pigment in water (Yun. column 11, lines 2-8).

During a telephone conversation with Mark D. Byrne on January 29, 2009 a provisional election was made without traverse to prosecute the invention of Group I, claims 13-20. Affirmation of this election must be made by applicant in replying to this Office action. Claims 21-28 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claims 21-28 have been cancelled.

These claims are drawn to a non-elected invention based on Applicants' election without traverse of Group I, claims 13-20 made on January 29, 2009 in a telephonic conversation with Applicants' representative Mark D. Byrne in response to an election requested made on January 21, 2009 in a voice mail message left for Mark D. Byrne.

Instant claims 13-20 are found allowable as detailed out below.

REASON FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art fail to suggest or teach a process of coating silica sand grains with pigment using the process steps recited in instant claims, specially claim 13, in particular with reference to mixing caustic soda and water for form a dilute caustic soda solution to which boric acid is added followed by a binder; the resulting solution is mixed with silica sand grains and dry pigment which would form a coating over said grains upon heating.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to PEGAH PARVINI whose telephone number is (571)272-2639. The examiner can normally be reached on Monday to Friday 8:00am-4:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jerry Lorengo can be reached on 571-272-1233. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
